Summary

Tech and AI lead on a consulting firm's leadership team. I build the AI systems revenue and operations teams run on, on their own data and local models, and I lead the adoption that gets them used.

Experience

Lead AI Developer (Tech & AI lead, leadership team) February 2025 – Present
AI-First Consulting | ai-first.ca *Halifax, NS*

GTM & internal systems

- Led and architected Keystone (rolling out), the firm's system of record over SharePoint, Linear and QuickBooks, with every capability exposed to staff and to Claude through one registry and MCP.
- Ran the discovery behind its attract → convert → deliver → collect scorecard; it succeeds the CRM I built solo.
- Cut proposals from days to 30 minutes and turned every client meeting into Linear tasks (Fireflies, Claude).

*Client builds: **39** client projects across 31 organizations, from AI Accelerator sprints to custom builds*

- Built RFQ, RFP and legal-review triage agents for HVAC, consulting and recruitment firms (Power Automate).
- Led RAG chat platforms grounded in clients' own content, with eval-gated releases (Next.js, pgvector, Claude).
- Leading an on-prem build: a local-model assistant on the client's own GPU, so the data never leaves the site.

Adoption & leadership

- Hold the leadership team's tech and AI seat; hire and manage the co-op developers building my architecture.
- Won **18 of 40** sales opportunities I owned (67% of decided deals) across custom builds, advisory and training.
- Ran AI Accelerator sprints, cohort programs and workshops for client teams, CPA firms and a college.

AI Instructor & Curriculum Developer August 2025 – April 2026
ShiftKey Labs, Dalhousie University *Halifax, NS*

- Designed a provincial Skills for Hire data science and ML curriculum: **226** learners, 88% completion.
- Co-taught an agentic AI course for non-CS students at Dalhousie, who built agents with n8n and Bolt.

Co-Founder October 2024 – January 2025
CarGrep (ShiftKey Build) | cargrep.com *Halifax, NS*

- Built an AI car-recommendation platform with conversational search and streaming answers (GPT-4o).

Selected Projects

Keeper — self-hosted meeting memory on a local model, served over REST, MCP and a web UI 2026
dgx-autonomy — a coding agent that runs unattended on a DGX Spark against tests it can't edit 2026
HUGO — voice assistant for a Reachy Mini robot, with speech and the LLM local on a DGX Spark 2026
HealthByte — LLM personas reacting to real and fake health news | **1st Place, Atlantic AI Summit** May 2025

Skills & Certificates

GTM & Automation: CRM pipelines, Power Automate, Copilot Studio, n8n, Fireflies, Linear, QuickBooks Online
AI & LLMs: Anthropic Claude, MCP, RAG, pgvector, Voyage, Vercel AI SDK, evals, vLLM, SGLang, Ollama
Languages & Frameworks: Python, TypeScript, SQL, Go, Next.js, React, Node.js, FastAPI
Cloud & Infrastructure: Supabase, PostgreSQL, Azure, AWS, Vercel, Docker, Linux, NVIDIA DGX Spark
Certificates: AWS Cloud Practitioner, Communication Technologies & Cyber Security (Dalhousie)

Education & Awards

Dalhousie University | CGPA 3.8 Halifax, NS
Bachelor of Computer Science (Co-op) *Graduated May 2025*

- Future Tech Leaders Award · Sexton Scholar Award · Dean's List
